WELCOME TO OUR
CULTURE OF SUCCESS

At Starbright, we're a bunch of creative superstars who aim to help businesses exceed their digital potential. Based in the heart of Pretoria, we assist with crafting amazing brands that stand out in the digital world, develop phenomenal websites that are both beautiful and functional, and use cutting-edge digital innovation to drive business growth.

Our philosophy revolves around the importance of fostering long-term relationships with our valued clients. Every member of our team takes great pride in providing exceptional care, passion, and dedication to breathe digital life into their businesses.

By harnessing our collective creative energy through collaboration, we consistently deliver outstanding results that we can all take pride in.

SUCCESS

NAVIGATING THROUGH THIS
PROPOSAL

Thank you for the opportunity to quote on your project.
Our proposals are quite comprehensive, and we want to ensure that we're all on the same page. No pun intended 😉

The proposal is broken down into the following sections:

SERVICE OFFERING
Price breakdown of your application

FUNCTIONALITY SPECIFICATIONS OVERVIEW
An overview of the requirements of the project

INCLUSIONS and EXCLUSIONS
What is offered and what is not offered in this proposal

TERMS AND CONDTITIONS AND PROPOSAL ACCEPTANCE
Initial each page and sign on the dotted line

SERVICE OFFERING

✓ NB! All quoted amounts are exclusive of VAT

YOUR APPLICATION DEVELOPMENT
SERVICES INCLUDES:

Hosting and development environment setup and configuration (4 Hours)	R 0.00 once-off

Project setup (4 hours)	Laravel + Vue + Vite, auth scaffolding
User Roles and Permissions (6 Hours)	Laravel policies + auth middleware
Authentication (6 Hours)	Basic login, forgot/reset password with SMS
User Profile CRUD (8 Hours)	Admin can manage all users, edit roles
Student Management (10 Hours)	Full CRUD, validations, uploads, layout
Course Management (8 Hours)	Full CRUD, dashboard for averages
Link Students ↔ Courses (6 Hours)	UI to assign/remove with custom cost logic
Student Payments (5 Hours)	CRUD with links to students
Test Scores (5 Hours)	CRUD, validations, role permissions
Password Reset via SMS (5 hours)	SMS integration (Twilio, Clickatell, etc)
Basic Dashboards and widtgets (5 hours)	For admin stats, table or visual summaries
Responsive Frontend (Vuetify) (8 Hours)	Component layout, mobile responsiveness

SaaSR Monthly Cost	
Total monthly SaaS Application Development (75 Hours)	R 4,900.00 per month
Digital Ocean Virtual Server Hosting Server specifications. (These hosting environments are infinitely scalable and could grow as the project evolves over time.) • 1 vCPU • 2GB Memory • 50 GiB SSD block storage	$ 12.00 per month (R 225.00 per month)

Client Initial

FUNCTIONALITY SPECIFICATIONS OVERVIEW

DESCRIPTION

Tuniti Care Hero trains and places caregivers with their respective clients. Current administrative tasks consist of a mixture of Excel, Word, and other electronic media. The Tuniti Hero Hub application will serve as a central dashboard to facilitate and enhance administrative processes, such as capturing student enrolments, managing students and their marks, and handling student payment schemes.

The system will serve a multi-purpose role: as an administrative application and as a student portal. Students can eventually be listed as caregivers once they have successfully completed their caregiver course(s) and then be placed with clients who require their services.

Furthermore, the application will be developed further in the future to include a client-facing component, allowing clients to access information about the care they are receiving from the Tuniti caregiving team.

FEATURES AND WORKFLOW

Users and Roles

The system will have support for multi-user architecture, meaning that multiple users can use the system at the same time, with different roles and access.

Users will be created for two roles, namely Administrators and Facilitators. More user roles can be created in the future, like Clients.

The system will support the following four (4) different roles. Users in the system will have different access and permissions, based on their user role. A user will only be assigned one role at a time.

Role	Description
Administrator	Full access to all features and information in the system. Add more users, manage passwords. Manage courses and course information. Link courses to students. Capture course payments.
Student	Read-only access to their own personal information, linked courses, course payments and marks on their profile page only.
Caregiver	See their own personal information, linked courses, payment schemes, marks on their profile page only, and client information *(Clients will only be added in a future phase)*.
Facilitator	Read-only access to student information. Can add and update student course marks, update internal administrative notes on students.

Miscellaneous Features

- Users will have the ability to update their password to a new random password, which will be sent to them SMS.

Student Administration

The student administration section will consist of standard CRUD (Create, Read, Update, Delete) forms. Only users with the Administrator role will be able to create students and manage their information.

- Capturing and administering student information.
- The following information will be captured on each student:
    - Student Number
        - Auto generated internal identification number: YYYYMM-1, YYYYMM-2 etc.
        - A student will also use this student number to log into Tuniti Hero Hub.
    - Password
    - Internal Admin Notes
        - Only visible to specific roles
        - Not visible to the student or caregiver
    - Title
    - Initials
    - Surname
    - Full Name
    - Known As
    - Mobile Number
    - Secondary Number

- Email Address
- Identity / Passport Number
- Date of Birth
- Nationality
- Profile Picture
- Gender
- Home Language
- Other Languages
- Secondary Contact Details
    - Name
    - Number
    - Relationship
- Physical Address
    - Complex / Estate
    - Street name and Number
    - Suburb
    - City / Town
    - Area Code
- How did you hear about Tuniti Hero?
    - Social Media
    - Google
    - Word of Mouth
    - Etc.

Course Administration

The course administration section will consist of standard CRUD (Create, Read, Update, Delete) forms. Only users with the Administrator role will be able to create course and manage their information.

- Capturing and administering student information.
- Dashboard with student averages per course
- Course name
- Course description
- Course duration
- Course cost

Course Students Link

Courses can be linked to students. Only users with the Administrator role will be able to link and unlink courses from students.

- Linking a course to a student
- Total cost field, which defaults to the cost of course, but can be adjusted per student
    - All course payments will be deducted from this course cost field and not the cost of the course. This will ensure that historical information isn't synchronized even when course costs are changed over time.
- Group name text field for the course link, i.e. Group 1, Group 2 etc.

Student Payments Link

Payments can be linked to students. Only users with the Administrator role will be able to link and unlink payments to students.

- Linking a payment to a student
- Total amount
- Short description

Student Test Scores Link

Test scores can be linked to students. Users with the Administrator or Facilitator role will be able to link and unlink test scores to students.

- Linking test scores to a student
- Total score in percentage (%)
- Short description of the test

THIS PROPOSAL INCLUDES:

- The functionality as per the Functionality Specifications above.
- Online or in-person kick-off Q&A session.

THIS PROPOSAL EXCLUDES:

- Any out of spec development requests. Such requests will be quoted for separately and added to the monthly SaaSR (Software as a Service Rental) pricing model. (See Additional Terms and Conditions below).
- Any additional 3d party costs that might be incurred immediately, or in the future, such as hosting environment tech stacks, 3d party APIs, SMS Credits etc.
- Integration with other 3d party systems.

Additional Terms and Conditions:

1. Subscription & Access

- Tuniti Care Hero rents the software on a subscription basis, gaining access to updates, maintenance, and agreed-upon features while under the subscription.
- The application is provided as a hosted service, ensuring seamless maintenance, security, and ongoing updates.
- Non-compliance with the monthly payment terms may result in restricted access or suspension of the application.

2. Agreement Duration & Termination

- The subscription period for the development phase as per the Functionality Specifications Overview above is 12 months, commencing from the date of service activation.
- After the initial 12 months, the subscription continues on a month-to-month basis, unless terminated with a 30-day written notice.
- If Tuniti Care Hero chooses to terminate the agreement before completing the 12-month period, the remaining balance for the full term will still be payable.
    - Example: If Tuniti Care Hero cancels in Month 10, payment for Months 11 and 12 will still be required.

3. Out-of-Scope Development & Custom Features

- Any request for new features, customizations, or functionality beyond the agreed scope as per the Functionality Specifications above, will be quoted separately.
- Payment Options for Additional Development:

A 12-month installment plan will apply: The total cost will be divided by 12 and added to the monthly subscription fee as a separate invoice line item for each additional phase of development. The additional line item will run on its own 12-month period, after which it will also continue on a month-to-month basis.

- Example: If additional features cost R12,000, the monthly fee will increase by R1,000 per month, with a minimum of 12 months. This scope of work will be clearly indicated with a separate item on the monthly invoice.

4. Continuity & Pricing Adjustments

- This is not a "pay-to-own" model – the adjusted SaaS fee will continue beyond the 12-month period, ensuring long-term service sustainability.

5. Ownership & Hosting

- Tuniti Care Hero acknowledges that the software is provided as a managed service, with hosting, updates, and maintenance forming an integral part of the subscription.
- As such, the software remains hosted within Starbright's controlled environment, ensuring service continuity, security, and performance.
- The agreement does not grant Tuniti Care Hero ownership rights to the software, source code, or hosting infrastructure.
- The software may not be transferred, migrated, or hosted on Tuniti Care Hero's own servers or any other third-party infrastructure.

6. Approval Process

- Tuniti Care Hero must approve any out-of-scope work and associated cost adjustments in writing before development begins.

- Starbright will provide a written quote or proposal, detailing the cost and timeline for delivering the requested features.

7. Service Level Agreement (SLA) & Support Commitments

- Support Requests
  - All support queries must be logged via *support@starbright.co.za* to ensure proper tracking and response.
  - Support requests are handled during standard business hours (Monday–Friday, 08:00–17:00 SAST, excluding public holidays).
  - Critical issues (application outage) receive priority response.
- Hosting & Uptime Expectations
  - The application will be hosted on a DigitalOcean virtual private server (VPS), a state-of-the-art hosting platform with high availability.
  - While Starbright cannot guarantee a specific uptime, we adhere to the uptime commitment provided by DigitalOcean.
- Security & Risk Acknowledgement
  - Starbright follows industry-standard security and development practices, but no application is ever completely immune to security threats or system failures.
- Data Backup & Disaster Recovery
  - Starbright will perform daily offsite backups of the database via remote MySQL dumps to ensure data integrity.
  - The application's source code is securely stored in a private GitHub repository with version control and rollback capabilities.
  - In the event of a critical failure or disaster, we aim to restore service within 24–48 hours, depending on the severity of the issue.

PROPOSAL ACCEPTANCE

We, _____ **(the Client)**

hereby agree to activate the services selected on the Service Offering page.

- ✓ The Client acknowledges and accepts Starbright's Website Terms & Conditions.
- ✓ While we employ industry-standard practices and technologies to maintain and secure your data, we do not guarantee that these measures will prevent all potential security breaches or unauthorised access.
- ✓ Given the constantly evolving nature of cybersecurity threats, it is important for clients to understand that no website can be rendered completely immune to hacking attempts.
- ✓ By signing this agreement, the client acknowledges the inherent risks associated with internet-connected systems and accepts the level of service provided by Starbright.
- ✓ The client also agrees to hold Starbright harmless and exempt Starbright from all responsibility in the event of a security breach, unauthorised access, or any other form of cyberattack that might result in any damage or losses.
